

Swabri Kanenje

Golang Developer, DevOps

Portfolio: <https://folio.work.gd/> Kisumu, Kenya | 254723975141

Profile Summary

I'm a passionate Golang developer focused on building scalable backend systems using modern Technologies. Currently, I'm expanding my expertise in the Go ecosystem and modern software infrastructure. My skills include a methodical approach to problem-solving. I aim to create maintainable and efficient solutions in cloud and distributed systems.

Core Skills

Category	Skills
Programming Languages	Go, JavaScript, Python, Rust
Web Development Skills	Websockets (RTC), Frontend(HTML, CSS, TailwindCSS)
Database Management	SQLite, MySQL, PostgreSQL, NoSQL(json)
Web Application Frameworks	React, NextJS
DevOps Practices and Cloud	Kubernetes, Docker, GitHub Actions, AWS

Work Experience

Software Developer

Jan 2024 - Present

ZONE01KISUMU | Kisumu, Kenya

Enrolled in the 2-year full stack developer training program with a focus on peer-to-peer learning and practical projects.

- Developing efficient algorithms and backend services using Go, creating robust and scalable applications. Building event-driven architectures with Kafka for improved system communication.
- Applying methodical problem-solving approaches derived from electrical engineering background.
- Exploring and implementing IoT solutions that leverage distributed systems principles.
- Contributing to collaborative development environments with a focus on best practices.

Education

Dedan Kimathi University of Technology - Nyeri, Kenya Sep 2021 - Nov 2022

Diploma | Electrical and Electronic engineering

GPA: Distinction
