

Swabri Kanenje

Full-Stack Developer: JS | Go [Portfolio](#) [Github](#) [email](#) | Kisumu, Kenya | 254723975141

Profile Summary

Junior Backend Developer skilled in distributed systems (Go, Rust), web technologies (JavaScript, GraphQL), and system programming (Unix, Rust). Experienced in parallel processing, algorithm optimization, and building scalable infrastructure. Leveraging methodical problem-solving approach to create robust, maintainable solutions that enhance application performance and reliability

Work Experience

Software Developer **Jan 2024 - Present**

Enrolled in the 2-year full stack developer training program with a focus on peer-to-peer learning and practical projects.

- Designing and implementing scalable backend services using Go, with a focus on performance optimization and clean code principles, as demonstrated in projects like portfolio API.
- Crafting responsive frontend interfaces for web applications using modern frameworks like React
- Applying methodical problem-solving approaches derived from electrical engineering background.
- Contributing to collaborative development environments, adhering to best practices in version control, CI/CD, and code reviews, as evidenced by consistent GitHub activity
- understanding of low-level programming concepts, including memory management and hardware-software interfaces

Core Skills

Category	Skills
Programming Languages	Go, JavaScript, Rust
Web Development Skills	WebSocket's (RTC), Frontend (HTML, CSS, TailwindCSS)
Database Management	SQLite. MySQL, NoSQL(json)
Web Application Frameworks	React, NextJS , RubyOnRails
DevOps Practices and Cloud	Kubernetes, Docker, GitHub Actions, AWS

Education

Dedan Kimathi University of Technology - Nyeri, Kenya Sep 2021 - Nov 2022

Diploma | Electrical and Electronic engineering

GPA: Distinction
